

International Welding Technologies

Leading manufacturer of stud welding equipment and fasteners

Description:

The IWT-C2 gun is a perfectly balanced and compact welding gun for use with capacitor discharge weld studs. The IWT-C2 gun utilizes our proprietary self-lubricating bearing maximizing time between routine gun maintenance. It's precise spring pressure adjustment allows for a wide range of material specific welding without the changing of springs or use of special tools.

Weld Range:

#4-3/8" diameter fastener
in steel and stainless steel

Welding Process:

Capacitor Discharge, Contact

Welding Cables:

20ft of #2 highly flexible welding cable

Adjustable Legs:

To accommodate fasteners up to 3" long

Base Ring Diameter:

1.25 inch

Total Weight:

2lbs without cables

FEATURES

- MADE IN USA
- Easy to Use
- Light Weight
- Heavy Duty Cables
- Adjustable Leg Set
- New Comfort Grip

IWT C-2 Contact Gun for use with tipped studs

"Shown with optional template adaptor"
