

IWT-S1 Gun for C.D. Stud Welding Systems

International Welding Technologies

Leading manufacturer of stud welding equipment and fasteners

Description:

The IWT S-1 precision welding gun enables the user to gain access to extremely tight locations. A six inch shaft extension allows users to reach into the rear of panels. It is equipped with an automatic trigger switch—just push the stud into place to weld the fastener. The IWT S-1 represents the ultimate in stud welding simplicity.

Weld Range:

#4-1/4" diameter fastener
in steel and stainless steel

Welding Process:

Capacitor Discharge, Contact

Welding Cables:

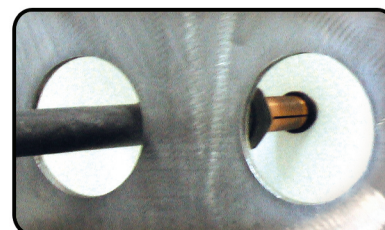

15ft of highly flexible welding cable

Length:

11 inch overall, 6 inch extension

Total Weight:

2lbs without cables

THRU - HOLE WELDING

FEATURES

- MADE IN USA
- Easy to use
- Light weight
- Automatic triggering—push to fire
- Enables access to tight locations
- Fits all stud welders
- Uses standard IWT chucks

IWT S-1 extended reach gun for use with tipped studs

Access Tight Locations

Thru - Hole Welding

Welding Simplicity

Automatic Trigger
